County Mortality Dashboard

El Dorado County Mortality Dashboard, 2025

1 Overview

This static dashboard summarizes deaths among El Dorado County residents using selected death certificate fields. The dataset is assumed to already be restricted to El Dorado County residents. Deaths may have occurred inside or outside El Dorado County.

Summary Mortality Metrics

Metric	Value
Total Deaths	1909
Report Year	2025
Deaths Under 18	14

Metric	Value
Infant Deaths Under 1	4
Injury Deaths	163
Possible Overdose Deaths	107
Possible Suicide Deaths	39
Possible Homicide Deaths	5
Possible Firearm Deaths	21
Possible Fall Deaths	22
Possible Motor Vehicle Deaths	637

17 Data Notes

Ranked cause categories are based on the final ICD-10 underlying cause of death field. Growing causes compare 2026 year-to-date deaths with the same months in 2025, rather than comparing partial 2026 counts to the full 2025 year. Conditions involved are not mutually exclusive. A single death may be counted under more than one involved condition. Injury, overdose, suicide, homicide, fall, motor vehicle, and firearm indicators are surveillance flags based on ICD-10 codes, manner of death, cause text, injury text, entity axis codes, and record axis codes. These flags should be reviewed before public reporting. County of death code 009 is interpreted as El Dorado County.
